EDUCATION

Georgia Institute of Technology

2021 - April 2023

Master's in Computer Science

GPA: 4/4

National Institute of Technology Surathkal

2016 - 2020

Bachelor of Technology in Computer Science

GPA: 9.75/10

TECHNICAL SKILLS

Languages	Java, Go, Python, TypeScript, JavaScript, Scala, C/C++, R
Frameworks	Spring Boot, Node.js, GraphQL
Data / Infra	Kafka, Kubernetes, Elasticsearch, AWS, Flink, Iceberg, Druid
Datastores	SQL, MongoDB
Tools	Cursor, MCP, Git, Maven, JMeter

EXPERIENCE

Rippling

May 2024 - Present

Senior Software Development Engineer

- Led and drove a cross org initiative to build managed connectors for connectors like SFDC, Jira, greenhouse by developing a highly scalable and fault tolerant platform that can ingest data and persist in destinations within Rippling
- Worked on a validation framework to catch data quality issues at scale and reduced the time cycles to fix them from weeks to days
- Onboarded four new engineers across levels to the new team across geographies in US and India
Built an AI based search engine that converts prompt to an activity such as applying for PTO
Built a validation framework to audit discrepancies at scale between two different data sources
- Designed and developed a scalable aggregation engine handling 50+ dimensions (taxes, deductions, wages) for 20,000+ companies and 1M+ employees, enabling streamlined tax filing across U.S. agencies.
- Built a comprehensive audit framework to detect discrepancies across 20M+ records, ensuring accurate data migration from legacy systems.
- Engineered snapshot infrastructure for periodic company and employee data snapshots, optimizing filing processes.
- Led hiring efforts by conducting interviews for diverse roles to support team growth
- Filed three patents – one for the aggregation engine, for a AI based search engine, and a AI based validation framework

Bodo.ai

May 2023 - Present

Senior Software Development Engineer

- Led design and development of billing export at cluster and job-run levels, reducing server costs by 30
- Developed auto-availability zone feature, reducing cluster failure rates by 40
- Collaborated on roadmap planning and process improvements to enhance code quality and reliability.
- Optimized compute costs by integrating spot instances, cutting expenses by over 50
- Integrated new APM tools with microservices, reducing costs by an additional 50

Ula

May 2021 - August 2022

Senior Software Development Engineer

- High-Level Design and Low-Level Design of features such as Digital Pod Automation(Hompage customization) based on user behavior, Digital Goods, Chatbot, Grab Defence Integration, and homepage revamp to improve conversions.
- Led Digital Pod Automation(homepage personalization) design and development based on user behavior project which improved homepage conversions by 30 percent and resulted in 20 percent more orders.
- Led the Grab Defence Integration to improve the security of our clients which involved collaboration with the grab team, design, and development, and helped the risk and compliance team in their strategic goal to counter Fraud.
- Chatbot integration with Yellow Messenger as the third party which resulted in a reduction in the customer care load by about 40 percent.
- Mentored a team of 8 developers in app experience team and handled requirement gathering, and worked with stakeholders such as product managers, business heads to help in scoping the minimum viable product(MVP) along with code reviews and cross team collaborations.
- Taking interviews across levels, onboarding and mentoring new members, cleaning up tech debt and building processes to improve team velocity.

Software Development Engineer

June 2020 - April 2021

- Handled various feature releases and launches for micro services dealing with the retailer app as a part of growth and experience team.
- The work involved creation of a new payment Microservice, Scheduling of campaigns and banners, planner for sales app and product district visibility changes.

Google Summer of Code (GSoC) at Balabit

May 2020 - August 2020

Student Developer

- Enhanced Kafka destination implementation by adding template syntax and improving system performance.
- Contributed patches for bug fixes, performance improvements, and syntax upgrades.

Impel Labs

May 2019 - July 2019

Software Intern

- Built a web scraper using Scrapy, collecting data to create a multi-billion-entry database.
- Processed data with Flink (NER model) and streamed results to Druid using Kafka.
- Implemented IP validation jobs in Flink, visualized stream flow with Prometheus and Grafana.

ACADEMIC ACHIEVEMENTS

- All India Rank 292 in KVPY 2015 (SX) among 100,000+ candidates.
- Top 1 percentile in NSEA (National Standard Examination in Astronomy) by IAPT.
- Top 1 percentile in NSEP (National Standard Examination in Physics) by IAPT.
- Top 50 in DRONA (IIM Indore fest - IRIS), selected through aptitude test and writing assignment.

EXTRA-CURRICULARS

- Drummer and Manager of Carnatic Progressive Rock band "Churmuri Chai," winning awards at IIT Madras and NIT Surathkal.
- President of Music Club, Coordinator for ACM NITK Student Chapter, and member of Robocon NITK, SPICMACAY, Deb Soc, and Tronix Engineer Committee.
